[in linkedin.com/in/ravindudanthanarayana](https://www.linkedin.com/in/ravindudanthanarayana) | github.com/ravindudanthanarayana

CNCF, FinOps, AWS and Azure certified undergraduate with a strong passion for **DevOps/SRE and Cloud Computing**. Curious and motivated to continuously learn new technologies, build reliable solutions, and grow through real world experience. Enjoys collaborating with teams, adapting to challenges, and improving both technical and professional skills. **Seeking an internship opportunity** to contribute to meaningful projects, learn from experienced professionals, and gain hands on experience with modern cloud and DevOps technologies while creating value for the organization.

SKILLS

- *Devops & Cloud*
Docker, Kubernetes, Jenkins, Terraform, AWS, Azure, Linux, Shell Scripting - Bash, Github Actions, CI/CD, YAML, Prometheus, Grafana, Ansible
- *Version Control*
Git, Github, Bitbucket, GitLab
- *Databases*
MySql, MongoDB, Postgresql, OracleDB
- *Programming languages & Frameworks*
Python, Java, JavaScript, TypeScript, NodeJS, ExpressJS, ReactJS, NextJS
- *AI & ML*
PyTorch, TensorFlow, Scikit learn, Matplotlib, Seaborn, Langgraph, RNN, CNN, Keras
- *Collaboration & Productivity Tools*
Clickup, Trello

PROJECTS

DevSecOps Implementation (Click to view [Repo](#))

Kubernetes, Jenkins,, Argo CD-GitOps, SonarQube, Trivy, OWASP, Terraform-IaC, AWS EKS EC2

Drop Blocks is a cloud native DevSecOps project built with React, showcasing containerization, Kubernetes deployment, CI/CD automation, versioned releases, and scalable application management. It demonstrates modern software delivery workflows from source code to cloud deployment with a focus on automation, reliability, and operational consistency.

Real Time Kubernetes Logging System (Click to view [Repo](#))

EFK Stack, Kubernetes, Helm, AWS EKS EC2 EBS

Built a centralized Kubernetes logging solution to collect, process, and store container logs across cluster nodes. Configured Elasticsearch for scalable indexing with persistent storage and integrated Kibana for real time visualization, filtering and analysis. Enabled efficient monitoring and faster troubleshooting by ensuring seamless log flow from workloads to dashboards, supporting better observability and operational insights.

TravelGenie - Software Group Project (Click to view [Repo](#))

React, Node.js, Express.js, PostgreSQL

TravelGenie is an AI powered full stack travel planning platform designed for travelers in Sri Lanka. The system helps users discover destinations, generate personalized trip itineraries, find suitable hotels, manage travel budgets, and track expenses through an interactive and user friendly web application with smart recommendation features and seamless trip management capabilities.

SentiScope (Click to view [Repo](#))

MLflow, DVC, Flask, AWS - S3 EC2 ECR, Docker

An end to end MLOps system that analyzes YouTube comments in real time and delivers instant sentiment insights through an interactive Chrome extension, helping creators understand audience reactions easily.

K8s Home Lab Setup (Click to view [Repo](#))

Kubernetes, kubeadm, Vagrant, and VirtualBox

Built and managed a multi node container orchestration home lab environment for hands on DevOps and cloud native learning. Configured cluster networking, automated provisioning workflows, deployment management, troubleshooting, and infrastructure automation while practicing real world scalability and system administration concepts.

100 Days of DevOps/Cloud/MLOps - Kodekloud (Click to view [Blog](#))

Completed 200+ hands on DevOps, Cloud, Kubernetes, AWS, Azure, and MLOps labs through KodeKloud challenges. Experienced in CI/CD, Docker, Kubernetes, cloud deployments, automation, monitoring, and infrastructure management. Continuously building practical skills in scalable cloud and AI infrastructure with strong problem solving and real world troubleshooting experience.

LSTM Stock Price Predictor (Click to view [Repo](#))

TensorFlow, Python, RNN (LSTM)

Developed a deep learning model to forecast financial market trends using historical price data. I engineered a sliding window data structure to capture time series patterns and implemented data normalization techniques to improve prediction stability, leveraging Python for end to end time series forecasting and complex data vectorization.

EDUCATION

Sri Lanka Institute of Information Technology

2023 - Present

BSc(Hons) in Information Technology (UG)

Dharmaraja College - Kandy

2010 - 2023

GCE(A/L) - Physical Science Stream

CERTIFICATIONS

- Kubernetes & Cloud Native Associate(KCNA)
- Kubernetes & Cloud Native Security Associate(KCSA)
- FinOps Certified Practitioner
- AWS Certified AI Practitioner (AIF-C01)
- Azure Fundamentals (AZ-900)
- AWS Certified Cloud Practitioner (CLF-C02)
- GitHub Foundations Certification
- AWS Well Architected Proficient
- OCI Certified Foundations Associate
- Cisco Networking Basics

ACTIVITIES AND LEADERSHIP

- Science society - President 22/23 - DRCK
- Research Unit - Vice President 22/23 - DRCK
- Chess team - Vice caption - DRCK
- IEEE Student Branch - Member - SLIIT

REFEREES

Mr. Nimesha Jinarajadasa

Associate Solutions Architect at Kodekloud

Email : mhnimesh@gmail.com

Phone : [+94 70 311 2633](tel:+94703112633)

Mr. Chanuka Prabhashange Rajasinghe

Solutions Specialist at hSenid Mobile Solutions (Pvt) Ltd

Email : chanukar@hsenidmobile.com

Phone : [+65 85 764 629](tel:+6585764629)
